

Final review Guideline

Purpose

- To see if your project **works as planned**.
- To find out whether your OOAD indeed leads to **a good production code**.
 - After all, having a stack of documents means nothing at all, unless the project is properly implemented.

Presentation

- Presentation and Demo
 - Each team will be reviewed for about **20 minutes** (depending on the number of teams we have in the class).
 - 15 minute presentation
 - 5 minute demonstration

3

Slides of Presentation

- Presentation order
 - Project name, team member, etc.
 - Problem Statement
 - Use case diagram (next page)
 - Demo use cases (**demo first**)
 - Involving successful and alternative scenarios.
 - **Demo all new**, related use cases, and a **brief** demo of what you have already **demoed in midterm** review
 - Explanation of use-case text is not needed
 - Demonstration Snapshots (next page)
 - Design (next page)
 - Implementation (next page)
 - Lessons learned (next page)
 - Project information (next page)
 - Team Member efforts (next page)
 - How the team uses AI (next page)

4

Slides of Presentation

- Use case diagram
 - Mark use cases with “M” and “F” for what have been done in the midterm and final review, respectively
 - Explain “what’s new” after midterm review

M: Midterm review

F: Final review

5

Slides of Presentation

- Demonstration Snapshots
 - One snapshot for each use case (both midterm and final)

Use case 1: Edit slide

6

Slides of Presentation

- Design modeling
 - Show and explain design class diagram (DCD)
 - Are there any **external services**?
 - Show how you handle (encapsulate) external services
 - Are there any **variation points** in your application?
 - Show how you handle (encapsulate) variations
 - Are there any **concerns** when you consider your design
 - Show how you handle these concerns
 - Did you use any **GRASP** patterns or GoF **design patterns** to address any problems?
 - Explain how you use these patterns for **at least 1 instance**

Slides of Presentation

- Implementation
 - Show the **source code** of a significant functionality (**any patterns?**)
 - Run all Unit Tests (all should pass)
 - Show the source code of a **significant test case**

One

One

Slides of Presentation

- Project Information of **serverless** applications (for a brand new project)

Project information	Midterm		Midterm~Final		Final	
	UI (VC)	Domain (M)	UI (VC)	Domain (M)	UI (VC)	Domain (M)
LOC of production code	X	X	X	X	X	X
The number of classes of production code	X	X	X	X	X	X
The number of methods of production code	X	X	X	X	X	X
The number of unit tests (testXXX)	X	X	X	X	X	X
LOC of test code	X	X	X	X	X	X

Note: The Midterm column gives the values that you presented in midterm review;
The Midterm~Final column gives the values that you did after midterm review;
The Final column gives the overall values of the semester.

Slides of Presentation

- Project Information of **Web** applications applications (for a brand new project) next page

Project information	Midterm			Midterm~Final			Final		
	UI (VC)	Domain (M)		UI (VC)	Domain (M)		UI (VC)	Domain (M)	
		Client side	Server side		Client side	Server side		Client side	Server side
LOC of production code	X	X	X	X	X	X	X	X	X
The number of classes of production code	X	X	X	X	X	X	X	X	X
The number of methods of production code	X	X	X	X	X	X	X	X	X
The number of unit tests (testXXX)	X	X	X	X	X	X	X	X	X
LOC of test code	X	X	X	X	X	X	X	X	X ¹⁰

Slides of Presentation

- UI layer vs domain layer vs Client side vs server side

11

Slides of Presentation

- Project Information (for a maintenance project)
 - Use the following table for 3 times (pages) to present the values of Midterm, Midterm-Final, and Final

Project information	Original		Modified		New		Total	
	UI (VC)	Domain (M)	UI (VC)	Domain (M)	UI (VC)	Domain (M)	UI (VC)	Domain (M)
LOC of production code	X	X	X	X	X	X	X	X
The number of classes of production code	X	X	X	X	X	X	X	X
The number of methods of production code	X	X	X	X	X	X	X	X
The number of unit tests (testXXX)	X	X	X	X	X	X	X	X
LOC of test code	X	X	X	X	X	X	X	X

12

Slides of Presentation

- Team Member efforts

	Doing homework	Doing project
Team member John time efforts (hours)	X	X
Team member Mary time efforts (hours)	X	X
Total time efforts (hours)	X	X

13

Slides of Presentation

- How the team uses AI
 - Describe how you use AI to assist the team doing homework and project

14

Grading

- Grading is based on the following:
 - **Presentation** 20%
 - **Demonstration** 20%
 - **Project** 20%
 - Scale (linear to your team size)
 - Code
 - **Design** 20%
 - Any GRASP/GoF patterns
 - **Testing** 20%

15

Note

- Note:
 - Make sure you have the **proper environment** (e.g., wireless/wired network access) for your demonstration.
 - Bring the **connectors** you need (e.g., **HDMI connectors**)
 - Your slides should have **page numbers**.
 - Please provide **hardcopies** of your slides for the instructor and teaching assistant
 - Print 2 ppt pages in 1 A4 paper page; double sided; no back ground; black and white; avoid dark/black background.
 - **Before the class**, test your **slides** and the **projector** in the classroom
 - Delay is not allowed
 - Please **rehearse** your presentation beforehand to ensure proper **time management** and that the number of **slides** isn't excessive.
 - Start a **timer** (e.g., Windows **clock**) when you star

16
